Vaibhav Ganju

Senior UI Engineer | React, Angular, TypeScript, GraphQL | AI-Powered Frontends | LangChain | Scalable Web Apps
Raleigh-Durham-Chapel Hill Area

Summary

Senior UI / Frontend Engineer with 14+ years of experience building scalable, accessible, and high-performance web applications.

I transform complex requirements into reliable and maintainable interfaces using React, Angular, and TypeScript. My focus is on long-term stability—clean architecture, predictable behaviour, and UIs teams can confidently build on.

Expert in React (16+), Angular (2+ to 16), TypeScript, and modern frontend architectures, including micro-frontends and design systems.

Strong background in:

- Building large-scale SPAs
- Performance optimization & state management
- REST & GraphQL integration
- Node.js / Express microservices
- AI-powered UI using LangChain and AI agents
- Having hands-on experience in Firebase NoSQL database and Blockchain (Hyperledger, Ethereum)

Experienced in collaborating with product, UX, and backend teams to deliver enterprise-grade solutions in Agile environments.

Currently open to Senior UI Engineer / UI Architect / Staff Frontend / Full-stack Developer roles in the USA.

Apple iCloud Reporting; HTML , JSON ,CSS , JAVA , Memcached.

About Project

:

iCloud is the cloud service provided by Apple.It integrates multiple applications like Photo Stream, Mail, Contacts, Calendar, Documents, Find My Friend, Find My iPhone etc.

iCloud Reporting deals with all the reporting requirements of the different applications integrated with iCloud. The different interactive reports give a better understanding to the marketing executives for better planning and enhancements of the iCloud features. It also helps them in tracking various customer issues and getting an in depth knowledge of the app usage. It also helps business track the progress made by different applications and how popular they are among the users.

Responsibilities

:

Gathered and analyzed the business requirements from on-; and client and transformed into applications.

Designed different portlets for the reporting portal which is built on Life Ray 5.2 framework.

Managed to run Life Ray 5.2 in Apache Tomcat 7.0 server.

To change the HTML mark-up to HTML 4.01 Strict and CSS to CSS 2.0.

Designed a HTML based widget for displaying data to executives.

Project

:

Hitachi Reporting; HTML , JSON ,CSS , JAVA , High Charts.
